

Campaign: Types of femicide 1

24 Feb 2015

The concept of femicide, the killing of females because of their gender, allows for a broad classification of femicide types. We are launching an awareness-raising and information-spreading campaign on the term by means of a series of banners as part of a debate on the criminalization of femicide in European countries. At Femicidio.net we respond to a demand that comes from the feminist and organized women's movements who are asking for its legal recognition at a global level
